A newcomer to the web development world, I have taken a large interest in everything code in the last few years. I am looking to expand my knowledge of technologies, while working with a driven team of developers

TECHNICAL SKILLS

Node.Js, Express, JavaScript, jQuery, React.js, React, GIT, GitHub, MongoDB, Mongoose, MySQL, Sequelize, Firebase, Handlebars, HTML5, CSS, Bootstrap, Sass, Media Queries, APIs, Heroku, Command-Line

EDUCATION

University of North Carolina | Charlotte, Charlotte, NC
Full Stack Web Development | Coding Certificate | 2020
A 24-week intensive boot camp program taught by high level web designers from Bank of America. The boot camp focused on gaining technical programming and market-driven skills in HTML5, CSS3, JavaScript, jQuery, Bootstrap, Express.js, React.js, Node.js, Database Theory, MongoDB, MySQL.

PROJECTS

Eat The Burger | Full-Stack Developer | Deployed Link: burger68.herokuapp.com/
Code: github.com/Will-25/burger
This was a website I single-handedly created. It's a fun demonstration that utilizes database persistence to keep track of burgers and whether they are "eaten". When the user clicks the "submit burger" button, the text in the box is displayed on the screen, at the same time it is sent into the DB and the value for "devoured" is set to false. If the user clicks on the displayed text, it is then sent to the right side and the value for "devoured" is set to true in the DB.
- **Role**: I was responsible for all the front and back-end code for this assignment
- **Utilized**: HTML5, CSS3, HandleBars, MySQL, MySQL workbench, Node.js, Javascript

EXPERIENCE

Not Just Coffee, Charlotte NC, August 2021-Present
